

Curved wall? No problem.

Variable sized battens? Absolutely.

Timber ceiling or soffit lining?
The perfect solution.

Grad Concept France produces a large range of aluminium rails and plastic clips, connectors and supports for many architectural timber fixing applications, including decking, facades, soffits and ceilings. **Smartdeck** carries stock of **Grad Mini Rails** with **Sliding Clips**, as well as **Solo Clips** for direct fix to timber or other substrates, but we can supply any of the Grad system customised for any project you have – **just ask us**.

grad mini rail with sliding clips

What are Grad[®] clips made of?

Polyoxymethylene (POM) is a thermoplastic used in precision parts requiring high stiffness, low friction, and excellent dimensional stability. Grad[®] clips can be used across a wide range of temperatures (from -40 °C to 90 °C and more).
