Shou Sugi Ban (Charring) - Please enquire if you want any profile charred.

THERMALLY MODIFIED ARCHITECTURAL WOOD SYSTEM

KEY FEATURES AND BENEFITS

- Rapid installation – hidden fastening speed clip and end-matching system takes half the time
- No rainforest timbers
- No resin/tannin bleed
- No chemical treatment
- Less wastage – end-matching reduces off-cuts
- Straight and uniform dressed profiles
- Durable – resists warping, cupping and splitting
- Pre-coat service available with Equisol Pro365 penetrating oil

*m2 calculated incorporating the gap/overlap provided by the relevant clip.

NOTE: Many other profiles and species available by special order. Minimum quantities and approx 4 month lead times apply for thermally modified timber. Decking and cladding from the Hurfords range of Australian hardwoods can be ordered with around 1 week lead time, subject to availability

A 20% deposit is required at time of ordering for all special orders/pre-coating with colour/milling etc
